I had seen this and I assumed the guy was off work for the missing interval. I will check with Eric to see if that is correct or if there is an error.

**Subject:** Problem with Cumulative Exposure Spreadsheets

I found some problems in the cumulative exposure spreadsheets (Spreadsheets with entries by year and season, both AM and GM).

Worker 10233 has entries for 1958.2, 1958.3, 1959.1, then no entries until 1970.1, and then entries until 1980.2. Work duration is listed as 6/1/58 to 6/1/80.

Worker 17352 has entries for 1957.3, 1958.1, then no entries until 1967.3, and then entries until 1969.2. Work duration is listed as 9/1/57 to 6/1/97.

I did not do an exhaustive search for others with similar problems. Is there an easy way to search for gaps in entries using one of the Excel tools. Otherwise it will be a line by line visual for all 434 workers.
